## OUTREACH NEWS

This semester we are scheduling live events for K-12 students again! For both our Hands-on Purdue

Science programs (HOPS and AP Fridays) we are offering classrooms the following themes

**Wednesdays and Fridays in May:** Investigating Water Quality

[Check out the online labs and resources outreach has created.](#)

**Social sites:**

[TikTok SuperHeroesofScience](#)

[Facebook EAPS Outreach](#)

[Facebook Superheroes of Science](#)

[Twitter](#) [EAPS departmental outreach web page](#)

[Instagram](#)

**Are you heading out for field work soon? If so, take some video footage or photos for outreach to use for teaching about the amazing things that we research!**

## NEWS/OPPORTUNITIES

**APOPHIS T-7 YEARS: KNOWLEDGE OPPORTUNITIES FOR THE SCIENCE OF PLANETARY DEFENSE**

**Call for Abstracts and Registration Now Open!**

**May 11-May 13, 2022**

**Virtual**

The Apophis T-7 Years: Knowledge Opportunities for the Science of Planetary Defense virtual workshop is scheduled for May 11–13, 2022. This workshop will explore the dynamic details and corresponding science opportunities presented by the April 13, 2029, near-miss passage of the asteroid Apophis.

**Registration:** Registration fees are being collected for this virtual workshop. Only registered attendees will receive an email from Houston Meeting Info with virtual connection information.

**Registration is available through May 13, 2022.**

For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute [meetinginfo@hou.usra.edu](mailto:meetinginfo@hou.usra.edu)

**METEORITICAL SOCIETY TRAVEL GRANTS AVAILABLE FOR METSOC2022 MEETING IN GLASGOW, UK**

Students and ERCs are the future of our society. Thanks to the continued generosity of our supporters, more than \$100,000 will be available to support travel to this year's MetSoc2022 meeting in Glasgow, UK. The travel awards committee will provide as much financial support as possible to

each individual who applies. Awards are often for the full amount requested, and typically in excess of \$1,500 per person. We hope this can offset some of the additional costs for attendees, which have resulted from increased venue costs and the expense of running a fully hybrid conference.

**Grant requests are due no later than May 10, 2022.**

[Learn more and apply here.](#)

---

### **85TH ANNUAL MEETING OF THE METEORITICAL SOCIETY**

**August 14–19, 2022, Glasgow, Scotland**

The 85th Annual Meeting of The Meteoritical Society will take place August 14–19, 2022, at the Scottish Event Campus in Glasgow, Scotland. The meeting is hosted by the University of Glasgow planetary science research group. The meeting is an excellent opportunity to present and discuss your research and learn about the state-of-the-art advancements in our fields. We will be hosting a hybrid meeting, with in-person and virtual participation options.

**Call for Abstracts-** Oral and poster contributions on any aspect of meteoritics and planetary science are invited. **Abstract Submission Deadline: May 9, 2022, 5:00 p.m. U.S. Central Daylight Time (GMT -5).**

#### **Society Events -**

- **Sunday, August 14:** Meeting registration and a welcome reception begin at 5:00 p.m. British Summer Time (BST) at the Hunterian Museum housed within the historic main building of the University of Glasgow.
- Oral and poster sessions, plenary sessions, and the Barringer Invitational Lecture will take place at the Loch Suite of the Scottish Event Campus.
- **Wednesday, August 17:** Excursions to explore both the city and the neighboring countryside will be offered. The meeting banquet with ceilidh will be held in the evening at the magnificent Kelvingrove Art Gallery and Museum, the U.K.'s most popular museum outside London. The Kelvingrove is home to internationally important natural history and archaeological collections, as well as artwork by Salvador Dalí, Van Gogh, Whistler, Monet, and Botticelli.
- Several pre-meeting workshops (August 13–14, 2022) and post-meeting excursions (starting August 20, 2022) will be offered. See the meeting website for more information.

**Accommodations** - Rooms have been reserved in multiple hotels, offering a range of prices. The Scottish Event Campus is located in the center of

Glasgow, with six hotels within easy walking distance and many more just a stroll away. For hotels a little further away, public transportation in Glasgow is frequent and reliable, and the Scottish Event Campus has its own train station, bus stops, and taxi ranks.

Glasgow is undoubtedly one of Europe's most dynamic cultural capitals, steeped in culture, rich in history, and alive with excitement. It is also an easy destination to reach and travel around, with three international airports within an hour's drive and good rail, subway, and bus links.

For more information, visit the [meeting website](#).

---

### **20TH MEETING OF THE VENUS EXPLORATION ANALYSIS GROUP (VEXAG)**

**November 7-9, 2022**

**Pasadena, California/Virtual**

To include as many participants as possible and consider the possible impact of COVID-19 on in-person attendance, components of the meeting will be available virtually. Election Day in the U.S. is November 8 -- remember to vote early if you plan to attend the meeting in person.

The annual meeting is a forum for scientists and engineers to discuss NASA/U.S. exploration of Venus.

**Important:** To be added to the mailing list to receive additional information about this meeting, submit an indication of interest.

---

### **OUTER PLANETS ASSESSMENT GROUP (OPAG)**

**JUNE 14–15, 2022**

**WASHINGTON, D.C.**

[The OPAG meeting](#) is scheduled for June 14–15, 2022, at the Holiday Inn Washington Capitol – National Mall in Washington, D.C. To include as many participants as possible and considering the impact of COVID-19 on in-person attendance, components of the meeting will be available virtually. The focus of this meeting will include updates from NASA HQ, updates on current missions, and aspects of the Decadal Survey that are relevant to OPAG.

**Lightning Talk Session** - OPAG will host a lightning talk session on the afternoon of June 14 (there is no poster session for this meeting). Talks can focus on research, mission concepts, technology developments, etc. While open to all, we especially welcome talks by students and early-career researchers. OPAG looks forward to providing this opportunity to showcase your work and network. If you wish to give a lightning talk

(virtually or in person), complete this form by May 9. If you have questions, contact Kate Craft (Kate.Craft@jhuapl.edu) and Kunio Sayanagi (kunio.sayanagi@hamptonu.edu).

**Meeting Participation Stipends - The OPAG Steering Committee is pleased to announce the availability of a limited number of stipends for in-person and virtual attendance at the OPAG June 2022 hybrid meeting.** Travel stipends for \$1,000 aim to ensure active participation in OPAG by students and early-career researchers (less than ten years from Ph.D. serving in a non-tenured or equivalent position). Visit the meeting website for more information. **Application deadline: May 9, 2022**

**Registration - In-person registration deadline: May 31, 2022**

**Virtual registration deadline: June 15, 2022**

Registration fees are not being collected for this workshop, but registration is required. Before the meeting, registered attendees will receive an email from Houston Meeting Info with virtual connection information.

---

### **EAPS GRAD STUDENT RESEARCH OPPORTUNITIES**

If you are interested in an EAPS grad research opportunity, [click here](#) for more information.

---

### **ANCIENT VENUS CONFERENCE** **JULY 25-27, 2022**

**Lunar and Planetary Institute**  
**Houston, Texas/Virtual**

The conference will be hybrid -- in-person at the Lunar and Planetary Institute (LPI) in Houston, Texas and virtual. As a prelude to the flotilla of spacecraft that will target Venus in the next decade, the LPI's Venus Science Initiative aims to consolidate our understanding of that veiled planet, explore new hypotheses from the data in hand, and encourage innovative ways to exploit measurements from upcoming spacecraft. Venus's origin and history remain enigmatic -- current data appear inadequate or of insufficient precision to provide unambiguous answers to many fundamental questions, including how Venus formed and whether it ever had oceans and/or habitable environments. The high temperature of Venus's surface allows rapid reactions between the planet and the atmosphere, implying system-level feedbacks among its atmosphere, surface, and interior. Further, Venus is our best local example of other

terrestrial exoplanets, permitting a stronger understanding of other solar systems and their formation processes. In this initiative of four conferences, we will address these and other questions about Venus and provide a forum for scientific anticipation of coming spacecraft data.

**Objectives:** Venus is now shrouded in a thick, hot greenhouse atmosphere. What was Venus before the greenhouse, or has it always been this way? As Venus aged, how have the exchanges among its interior, surface, and atmosphere changed, and how did each of these reservoirs evolve? Thematically, the conference will focus on four main topics, while cementing the discussion around our knowledge of ancient Venus:

1. Accretion history of Venus
2. Evolution of the volatile inventory and climate on Venus
3. Habitability of ancient Venus
4. Geodynamics and surface processes through time

**Call for Abstracts: Abstract Deadline - May 11, 2022, 5:00 p.m. U.S. Central Daylight Time (GMT -5)**

**Important:** To be added to the mailing list to receive additional information about this conference, submit an indication of interest by May 23, 2022. [More info.](#)

---

### **MS AND PHD EAPS STUDENTS** **BROADEN YOUR GRAD EXPERIENCE**

For those MS and PhD students in EAPS that would like to broaden their graduate experiences while at Purdue, EAPS is affiliated with the Computational Interdisciplinary Graduate Programs (CIGP) at Purdue. While working toward a graduate degree in EAPS, graduate students can also have a concentration (specialization) in the area of Computational Science and Engineering (CSE). For more information, [click here](#). A short video about the CIGP/CSE program can be found [here](#).

**Fall Application Deadline:** October 1

**Spring Application Deadline:** March 1

---

### **EXOPLANETS IN OUR BACKYARD 2** **NOVEMBER 2-4, 2022** **Pasadena, CA/Virtual**

The Venus Exploration Analysis Group (VEXAG) meeting is scheduled two days after the Exoplanets workshop. As it becomes available, more information regarding the VEXAG meeting will be posted on the VEXAG website. Exoplanets in Our Backyard 2 is a workshop hosted by the Venus Exploration Analysis Group (VEXAG),

Outer Planets Assessment Group (OPAG), Exoplanet Exploration Program Analysis Group (ExoPAG), Mars Exploration Program Analysis Group (MEPAG), and Mercury Exploration Assessment Group (MExAG). The goal of the workshop is to examine and discuss exoplanet-solar system synergies on planetary properties, formation, evolution, and habitability. Topics include comparative planetology on worlds near and far; solar system studies as a baseline for studies of extrasolar planetary properties and evolution; and lessons learned on planetary statistics, demographics, and system architectures from extrasolar planetary systems. This workshop aims to foster and build new collaborations among scientists in the solar system and exoplanet communities and to help guide the direction of future exploration and observations of worlds in the solar system and beyond. [More info](#). For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute, [meetinginfo@hou.usra.edu](mailto:meetinginfo@hou.usra.edu)

---

### **METEORIDS 2022 CONFERENCE**

**June 13-17, 2022**

**Virtual**

The Meteoroids 2022 local organizing committee has closely watched ongoing developments of the COVID-19 pandemic and met to reconsider in-person delivery in Huntsville, Alabama. Given the recent sharp increase in positive cases and the unpredictable appearance of new variants, the committee has decided to shift the conference from in-person to fully virtual. Although it is disappointing not to be able to meet in person, the health and safety of all participants is our top priority.

#### **Registration deadline - June 17, 2022**

Visit the [Registration page](#) at the conference website for more information. Before the conference, registered attendees will receive an email from Houston Meeting Info with virtual connection information.

Meteoroids 2022 is the eleventh international conference in a triennial series of meetings on meteoroids, their origins, and their associated phenomena. Past conferences have featured a combination of invited and contributed talks and posters covering topics such as meteor observational techniques, meteorite recoveries, meteoroid stream dynamics, ablation physics and airbursts, impacts on airless bodies, the production of dust and meteoroids by asteroids and comets, space missions, and spacecraft anomalies.

We look forward to planning a successful conference and to seeing you virtually!

---

### **APOLLO 17 – ANGSA WORKSHOP**

**October 26–28, 2022**

**Lunar Planetary Institute**

**Houston, Texas**

The 3-day workshop is currently planned as an in-person workshop, October 26–28, 2022, at the Lunar and Planetary Institute in Houston, Texas. The 50th anniversary of the Apollo 17 mission is in Dec. 2022. By every metric, this mission to the Taurus-Littrow Valley (TLV) was the most accomplished of any of the Apollo missions to the moon, leading to 50 years of extensive, continuing analytical investigations of its observations, samples, photography, and geophysical data. The goals of this workshop are:

- revisiting the TLV by integrating new geologic and exploration context, new ANGSA sample data, orbital observations, and the full breadth of data sets from all six Apollo landed missions for a fuller understanding of the moon, the sun, and the earth
- establishing links among multiple generations of lunar scientists and engineers as we prepare for our future on the moon
- focusing on scientific and design lessons learned from both Apollo and from ANGSA in preparation for near-term human exploration of the moon.

We will also focus on specific topics, with short reports expected from the breakout groups and presented during the workshop. Presentations and results of the workshop will form the basis of a special issue in a peer-reviewed journal. Manuscripts for this special issue will be due within three months after the workshop.

---

### **ANNUAL MEETING OF PLANETARY GEOLOGIC MAPPERS**

**June 22–23, 2022**

**Flagstaff, Arizona/Virtual**

The Annual Meeting of the Planetary Geologic Mappers is scheduled to be held on June 22–23, 2022, at the Northern Arizona State University in Flagstaff, Arizona, with virtual participation available.

The annual meeting will bring together community members to report progress on geologic mapping projects, discuss a wide range of mapping strategies, and coordinate map-based scientific investigations of planetary surfaces at multiple scales. Specific attention will be focused on how geology-based site characterization can support

human exploration. Abstracts are solicited for topics, including progress reports on active mapping investigations, mapping strategies, mission support, community resources, and education. Group discussions will address map data standardization and dissemination, map-based investigations of geologic processes, ways to modernize and improve geologic maps for human and robotic exploration, and the use of geologic maps to support exploration. Important: To be added to the mailing list to receive additional information about this meeting, submit an indication of interest.

---

**WORKSHOPS ON IN SITU EXPLORATION  
OF THE GIANT PLANETS II**

**July 12-14, 2022**

**Johns Hopkins Univ. Applied Physics Laboratory,  
Laurel, Maryland**

The [Workshop on In Situ Exploration of the Giant Planets II](#) will build upon the results of the Workshop for In Situ Exploration of the Ice Giants held in Marseille in February 2019 addressing in situ exploration of the ice giants.

**Registration:** Registration on-site will be limited to 100 attendees, with pre-registration required. No onsite registration will be available. Registration details will be posted at a later date. Registered attendees will receive an email from Houston Meeting Info with virtual connection information. For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute, [meetinginfo@hou.usra.edu](mailto:meetinginfo@hou.usra.edu)

---

**BRINES ACROSS THE SOLAR SYSTEM:  
ANCIENT BRINES**

**September 12-15, 2022  
Reno, Nevada**

The Brines Across the Solar System: Ancient Brines conference will focus on integrating diverse fields of study, including but not limited to geology, mineralogy, (astro)biology, chemistry, planetary science, and physics. Of particular interest are the intersections of these fields as they apply to understanding the formation, location, and potential habitability of ancient brines on planetary bodies and any possible biosignatures that may be observed today. Thematically, the conference is focused on four main topics:

1. Evidence for ancient brines
2. Formation of brines on early planetary bodies
3. Habitability of ancient brines

**4. Role of brines in the origins of life**

Important: To be added to the mailing list to receive additional information about this conference, **submit an Indication of Interest by May 16, 2022.** [More info here.](#)

## **POSITIONS AVAILABLE- CAREER OPPORTUNITIES**

### **INDIANA DEPARTMENT OF HOMELAND SECURITY WATCH DESK OFFICER**

Indiana Department of Homeland Security has just posted a Watch Desk Officer position for hiring. The Watch Desk Officer position is entry level and is great for recent college graduates to get their foot in the door in the Emergency Management industry. The position is often a steppingstone, where the employee will get experience communicating and working with several branches of emergency management and are often promoted within IDHS. IDHS is looking for Watch Desk Officers with degrees in Meteorology, Emergency Management, Criminal Justice, GIS, or similar. [The job posting can be found here.](#)

---

### **METEOROLOGIST POSITIONS AVAILABLE TEGNA**

Multiple [meteorology positions](#) are open with TEGNA. **Betsy Kling**, Chief Meteorologist and an anchor for WKYC-TV The Land (Cleveland), is also a Weather Team leader and the lead weather talent recruiter for Tegna, her station's parent company, that owns more than 60 stations across the country. She hoping to make connections now that can be beneficial to those soon-to-be meteorologists as well as the stations in her company looking for budding talent. [She is happy to answer any questions you might have about the industry or the job search.](#) She is an AMS-CBM and NWA sealed four-time Emmy winner now in her 25th year in the business.

---

### **BRYAN ENVIRONMENTAL CONSULTANTS**

Homewood, IL

#### **SEEKING PART-TIME TO FULL-TIME POSITIONS**

- Bachelor's or Master's degree in environmental engineering, civil engineering, geotechnical engineering, geology
- Knowledge of State and Federal environmental regulations a plus

- Experience with Phase I and II Environmental Site assessments a plus
- Strong writing skills
- Proficient in all Microsoft Office applications
- Must have cell phone and computer (laptop)
- Valid Driver's License

---

**POST-DOC OPPORTUNITY - AIR FORCE SCIENCE & TECHNOLOGY FELLOWSHIPS**

The National Academies of Sciences, Engineering, and Medicine administers postdoctoral and senior research awards at the U.S. Air Force Research Laboratory (AFRL), the U.S. Air Force Institute of Technology (AFIT), and the U.S. Air Force Academy (USAFA) under the [Air Force Science & Technology Fellowship Program \(AF STFP\)](#). Seeking highly qualified candidates who are U.S. citizens and hold, or anticipate earning, a doctorate in a variety of fields of science or engineering.

**Application deadline dates (four annual review cycles): February 1, May 1, August 1, November 1**

Awardees have the opportunity to:

- Conduct independent research in an area compatible with the interests of the Air Force laboratories
- Devote full-time effort to research and publication
- Access the excellent and often unique Air Force research facilities
- Collaborate with leading scientists and engineers
- Awardee benefits:
- Base stipend starting at \$76,542; may be higher based on experience
- Health insurance (including dental/vision), relocation benefits, and a professional travel allowance

Applicants should contact prospective AFRL, AFIT and USAFA Research Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities. For detailed program information, to search for AFRL, AFIT, and USAFA Research Opportunities, and to contact prospective Research Adviser(s), visit [www.nas.edu/afstfp](http://www.nas.edu/afstfp).

---

**PURDUE ENVISION CENTER (UNDER ITAP) RECRUITING EAPS STUDENTS**

At the Envision Center looking to recruit EAPS students with background and interest in weather visualization. Details on the job opening can be found [here](#).

---

**ASTROCAMP**

AstroCamp is looking for graduating students (undergraduate or graduate) for a full-time program instructor position for physical sciences and astronomy concepts at their [outdoor science school in California](#). Link to job [here](#).

---

**POSITIONS AVAILABLE IN METEOROLOGY AND ATMOSPHERIC SCIENCE**

[View current career listings](#)

---

**AGI GEOSCIENCE JOB CENTER**

[Check listings here.](#)

---

**GRADIENT CORP  
MULTIPLE OPPORTUNITIES**

Please feel free to contact [Qianlai Zhang](#) if you are interested in applying and/or have any questions about the company and the opportunities.

---

**POSTDOC IN STABLE ISOTOPES AND REACTION KINETICS – INDIANA UNIVERSITY**

[Applications](#) are invited for a Postdoctoral Research Associate at Indiana University, USA. The project aims using non-traditional stable isotopes to measure reaction rates and understand the mechanisms of mineral-aqueous solution reactions. See our recent publications for details (Zhu et al., 2016, Chemical Geology; Zhu et al, 2020, 2021, GCA). The project will employ a combined experimental, analytical, theoretical, and modeling approach.

The successful candidate will hold a Ph.D. in earth sciences or a closely related field. A strong background in either stable isotopes or kinetics and thermodynamics is required. Experience performing aqueous geochemical experiments, and using geochemical equilibrium and kinetics models is highly desirable.

Salary is competitive and includes fringe benefits. The initial appointment will be for one year, with the expectation of renewable for another two years, subject to performance and funding availability. The candidate will be based on the Bloomington campus of Indiana University, and will have access to an extensive suite of analytical tools, including MC-ICP-MS, TIMS, ICP-OES, ICP-MS, FESEM, and FETEM.

---

**NATIONAL WEATHER SERVICE  
POSITIONS AVAILABLE**

[Check here for available positions](#) with the National Weather Service.

# NEWSLETTER INFO

## IMPORTANT NOTICE ABOUT THIS NEWSLETTER

This newsletter is used as the primary information source for current and upcoming events, announcements, awards, grant opportunities, and other happenings in our department and around campus. Active links to additional information will be provided as needed. Material for inclusion in the newsletter should be submitted to [Cheryl Pierce](#) by **5:00pm on Thursday of each week for inclusion in the Monday issue.**

For answers to common technology questions and the latest updates from the EAPS Technology Support staff, [click here](#). As an additional resource for information about departmental events, seminars, etc., see our [departmental calendar](#).
