

Jonathan R. Delph, Ph.D.

Assistant Professor

Department of Earth, Atmospheric, and Planetary Sciences

Purdue University

550 Stadium Mall Dr., West Lafayette, IN, 47907

(765) 494-5979 | jdelph@purdue.edu

Personal webpage: www.eaps.purdue.edu/delph

Research webpage: www.eaps.purdue.edu/csat

Education

2016 University of Arizona | Ph.D. in Geosciences

Thesis: Crustal and Upper Mantle Structure of the Anatolian Plate: Imaging the effects of subduction termination and continental collision with seismic techniques

2012 Arizona State University | B.S. Earth and Space Exploration – Geosciences

Professional/Research Experience

2020-Present Assistant Professor | Purdue University

2019-2020 Post-doctoral Researcher | University of Oregon

2016-2019 Wiess Departmental Postdoctoral Research Fellow | Rice University

2015 Deep Water Exploration and Production Intern | Chevron

2012-2016 Graduate Teaching and Research Assistant | University of Arizona

2012 WestCarb Carbon Sequestration Project Intern | Arizona Geological Survey

2011 IRIS Undergraduate Summer Intern | Virginia Tech

2010-2012 NASA SpaceGrant Undergraduate Intern | Arizona State University

Research Interests

- Improving imaging techniques and seismic models of the lithosphere and upper mantle
- Combining seismic and geochemical characteristics to understand the structure of arcs
- Understanding the magmatic and tectonic evolution of Cordilleran systems
- Investigating the relationships of fluids with the seismic characteristics in subduction zones (tremor, seismic structure, earthquake behavior)

Field Experience

- *SCENTAR: Southern Cascadia Seismicity and Tectonics Array*
 - Deployed 60 short-period (5 Hz) three-component Fairfield Nodal seismometers in the northern California forearc to study microseismicity and non-volcanic tremor
- *Upper Geyser Basin Seismic Imaging Project*
 - Deployed ~500 short-period (5 Hz) three-component Fairfield Nodal seismometers around Old Faithful in Yellowstone National Park
- *Continental Dynamics-Central Anatolian Tectonics: surface to mantle dynamics during collision to escape* (NSF Award #1109336)
 - Deployed and serviced ~72 broadband three-component seismic instruments in central Turkey
- *Deformation and Magmatic Modification of a Steep Continental Margin, Western Idaho – eastern Oregon* (NSF Award #0844260)
 - Assisted in the deployment of broadband three-component seismic instruments

Supervisory Roles

Graduate Students

- Shihan Wu (EAPS PhD student: project in progress)
"The structure of the Cascadia forearc from a high-density nodal array"
- Manuela Hurtado (EAPS MS student: project in progress)
"Constraining deep crustal processes with radial anisotropy beneath the Olympic Mountains, WA"
- Inashua Kharjana (EAPS PhD student: project in progress)
"Estimates on potential earthquake shaking from the analysis of particle motion"
- Brandon Herr (EAPS MS Student: project complete)
"Using Ambient Noise Tomography to Reveal Tectonic Processes in the Southern Cascadia Forearc"
- Rahul Bhattacharya (EAPS MS Student: project complete)
"Constraining the Composition of Subcreted Material along the Cascadia Forearc using 3D Gravity Modeling"
- Dequan Hong (Rice University visiting student: project complete)
"Joint inversion of receiver functions and ambient noise data beneath the Qinling orogenic belt"
- Clinton Koch (UArizona PhD Student: graduated in 2021)

“Lithospheric Structure of the Ecuadorian Orogenic System and Event Location using the Seismoacoustic Wave Field”

- Daniel Portner (UArizona PhD Student: graduated in 2018)
“Subduction termination through progressive slab deformation across eastern Mediterranean subduction zones from updated P-wave tomography beneath Anatolia”
- Bijan Abgarmi (UArizona PhD Student: graduated in 2017)
“The nature of central Anatolian crust and uppermost mantle from teleseismic receiver functions; the role of slab dynamics on rapid uplift”
- Dakota R Isaacs (UArizona Masters Student: graduated in 2016)
“Imaging the lithospheric-scale Structure of the Central Andes using P-S Receiver Functions, 16° - 25° S”

Undergraduate Students

- Manuela Hurtado (undergraduate, UColombia - Medellin Campus: Colombia-Purdue Partnership program)
“The Geologic Structure of Colombia's Eastern Cordillera using Seismic Scattering Techniques”
- Joshua Balan (EAPS undergraduate student: project in progress)
“Algorithm optimization for earthquake detection and location a nodal seismic dataset”
- Aniket dev Roy (EAPS undergraduate student: project in progress)
“Analyzing teleseismic P-wave particle motions to constrain shallow shear-wave velocity structure for hazard mitigation”
- Brandon Herr (EAPS undergraduate student: project complete)
“Receiver function imaging of the lithospheric structure of the Hawaiian shield volcano using H-k and adaptive CCP stacking”
- Madigan Graber (EAPS undergraduate student: project complete)
“Imaging the crustal structure of Mt. St. Helens using P-wave coda”

Thesis Committees

Primary (* *matriculated*)

- Shihan Wu (EAPS PhD Student: 2024-present)
- Manuela Hurtado (EAPS MS Student: 2024-present)
- Inashua Kharjana (EAPS PhD Student: 2023-present)
- Brandon Herr* (EAPS MS Student: 2022-2024)
- Rahul Bhattacharya* (EAPS MS Student, 2021-2023)

Member (* *matriculated*)

- Haoyu Li (EAPS PhD Student: 2023-present. Primary Advisor: Yang)
- Ya-Li Lizik (EAPS PhD Student: 2023-present. Primary Advisor: Yang)
- Wenbo Zhan (EAPS PhD Student: 2023-present. Primary Advisor: Tremblay)
- Brandon Keough (EAPS PhD Student: 2023-present. Primary Advisor: Ridgway/Eddy)
- Vince Sassard (EAPS PhD Student: 2022-present. Primary Advisor: Yang)
- Sourav Karmaker (EAPS PhD Student: 2021-present. Primary Advisor: Eddy)
- Cody Kupres* (EAPS MS Student: 2022-2024. Primary Advisor: Yang)

Departmental Service

- Alumni and Corporate Relations Committee
- Undergraduate Committee
- Strategic Planning Committee

Teaching Experience

- **Purdue University**

EAPS 116: Earthquakes and Volcanoes (Fall 2022, 2024)

EAPS 354: Plate Tectonics (Spring 2022)

EAPS 375: Fossil Fuels, Energy, and Society (Spring 2023)

EAPS 591: Global Tectonic Systems (Fall 2020, 2021, 2023)

EAPS 591: Subduction Zone Inputs and Outputs (Spring 2022)

EAPS 591: Applications of Gravity and Magnetic Data (Spring 2022, 2024)

- **Rice University**

ESCI 520: Geophysical Research Seminar (Co-Instructor: Spring 2017, 2018)

ESCI 519: Geophysical Research Seminar (Co-Instructor: Fall 2016, 2017, 2018)

- **Workshop Instructor**

MIMOSA Ambient Noise Tomography Workshop (January 17-23, 2016, Tucson, AZ, USA)

Co-taught a workshop aimed at teaching ambient noise tomography to faculty, graduate students, and network operators from South America as part of the NSF-funded Multi-scale Imaging of Modern Orogenic South America (MIMOSA)

- **University of Arizona**

GEOS 432/532: Introduction to Global Seismology (Teaching Assistant: Fall 2014)

GEOS 211: Oceanography (Teaching Assistant: Fall 2012, Spring 2013)

GEOS 432/532: Introduction to Global Seismology (Guest Lecturer: Fall 2014)

GEOS 419/519: Physics of the Earth (Guest Lecturer: Fall 2014)

- **Arizona State University**

GEO 103: Introduction to Geology (Laboratory Instructor, Fall 2011)

GEO 101: Introduction to Geology (Teaching Assistant, Spring 2012)
