FACULTY CANDIDATE COS ORIGINS OF LIFE SEARCH – DR. TIM LICHTENBERG

WEDS., FEB. 16, 10:30-11:30 A.M. HAMP 2244

Post-doctoral fellow, University of Oxford
Website Curriculum Vitae

Public Seminar: “Molten Exoplanets as a Window into the Earliest Earth”

Abstract: Due to the absence of a reliable rock record from the Hadean eon, our understanding of the planetary environment that gave rise to life on the earliest Earth is clouded. Upcoming exoplanet surveys, however, will significantly widen our view of the distribution and variability of rocky planets and their chemical inventories, giving opportunities to test scenarios of early planetary evolution. I will describe recent developments towards a comprehensive theoretical framework to simulate the coupled evolution of solidifying planetary mantles and their outgassing atmospheres on young rocky worlds for a wide range of instellation, mass, and composition. Geophysical interpretation of exoplanet surveys enables novel inferences on the bulk composition of planetary populations and detailed characterisation of individual short-
period exoplanets. In the next years, this will allow fundamental insights into the redox state and thus climatic and geodynamic properties of rocky worlds. I will conclude with an outlook on how characterisation of the climate and geochemistry of hot rocky exoplanets will open the path to constraining the earliest surface environment of the prebiotic Earth.

Bio: Dr Tim Lichtenberg studies the physical and chemical processes that affect the formation of atmospheres and the long-term evolution of rocky planets. He studied physics at the University of Göttingen, Germany, and obtained an interdisciplinary PhD in astrophysics and geophysics from ETH Zurich, Switzerland, which was awarded the PhD prizes of the International Astronomical Union and the German Astronomical Society. Since 2018, he works at the Department of Atmospheric, Oceanic and Planetary Physics at the University of Oxford as a postdoctoral fellow of the Simons Collaboration on the Origins Life. Awarded the Royal Astronomical Society’s Winton Award for Early Achievement in Geophysics for his recent work, Dr Lichtenberg uses constraints from exoplanet surveys and geochemical data from the early Solar System to gain insights into the planetary environment of the origins of life on Earth in the context of cosmic diversity.

Co-Host Contact: Stephanie Olson and Brandon Johnson.

PSPSPS SEEKING SUBMISSIONS OF PET PHOTOS FOR CALENDAR

The EAPS 22-23 Committee on Planning the Selection of Purdue’s Special Pets (PSPSPS) is seeking submissions of pet photos from willing participants within the EAPS department for inclusion in an upcoming publication. This objective of this program is to create a calendar showcasing the lovely pets within our department and give them the recognition and attention they deserve. Please fill out this form for submission. (Google login required to submit form.)

The calendar will cover an 18-month period, beginning in August of 2022 and ending in December 2023. If you have multiple pets that you would like included, please try to include them in the same photo. If anyone has important dates they would like included in the calendar, those can be added as well (pending committee approval outlined in the PSPSPS handbook).

The submission deadline to be included in the calendar is February 28, 2022. We will send out regular reminders until that point. Calendars will likely cost $15-20 and the money will support the EAPS Graduate Student Assembly. Please do not hesitate to reach out to hvannier@purdue.edu if you have any questions.

APOPHIS T-7 YEARS: KNOWLEDGE OPPORTUNITIES FOR THE SCIENCE OF PLANETARY DEFENSE

Call for Abstracts and Registration Now Open!
May 11-May 13, 2022
Virtual

The Apophis T-7 Years: Knowledge Opportunities for the Science of Planetary Defense virtual workshop is scheduled for May 11–13, 2022. This workshop will explore the dynamic details and corresponding science opportunities presented by the April 13, 2029, near-miss passage of the asteroid Apophis.

Call for Abstracts: Abstract submission deadline-March 23, 2022, 5:00 p.m. U.S. Central Daylight Time (GMT ¬-5)
Registration: Registration fees are being collected for this virtual workshop. Only registered attendees will receive an email from Houston Meeting Info with virtual connection information. Registration is available through May 13, 2022. For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute meetinginfo@hou.usra.edu

53RD LUNAR AND PLANETARY SCIENCE CONFERENCE
MARCH 7-11, 2022
THE WOODLANDS, TEXAS/VIRTUAL

The 53rd Lunar and Planetary Science Conference (LPSC) will be a hybrid conference on March 7–11, 2022. Proof of full vaccination for all in-person conference attendees is required. If you are not comfortable attending in person, we invite you to consider virtual participation.

Program
• Detailed information about the schedule is available by viewing the program and abstracts.
• Check the author index to see where a particular presentation is scheduled.
• Visit the Conference Schedule page for a downloadable copy of the agenda.
• Vaccination Verification and Registration Information: Instructions to submit your proof of full vaccination verification (in-person attendees

http://www.eaps.purdue.edu/
only) and to register for the conference (in-person and virtual attendees) are available at the LPSC Registration page.

Deadline for early registration: February 18, 2022
Onsite registration will not be available.
Meeting and Publication Services, USRA/Lunar and Planetary Institute meetinginfo@hou.usra.edu

STUDENT AND EARLY-CAREER EVENTS
53RD LUNAR AND PLANETARY SCIENCE CONFERENCE
MARCH 7-11, 2022
THE WOODLANDS, TEXAS/VIRTUAL
We are planning a variety of student and early-career events for LPSC and invite you to attend as participants, mentors, and presenters! Many of these require advance registration. We are seeking experienced attendees to help as reviewers and mentors. Please join us!
For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute meetinginfo@hou.usra.edu

GROUNDWATER SUMMER INTERNSHIP
The Indiana Department of Environmental Management (IDEM) Groundwater Section's summer internship positions have been posted. The Groundwater Section works with water quality related to drinking water from groundwater sources for both public water supplies and private water wells. This summer our interns will get experience doing field work with Harmful Algal Bloom (HABs), Groundwater Monitoring Network, and PFAS sampling projects. The Groundwater interns are based out of Indianapolis, Indiana and work 37.5 hours a week at $13.21 an hour. We have had both undergraduate and graduate students and recent graduates as interns in the past. One of the perks is that after doing the internship you are an internal applicant for state positions if you choose to pursue a career with the State of Indiana.
Groundwater intern posting (Requisition ID 312386)
The internship is through the Governor's Public Service Summer Internship Program and there are other positions within IDEM and other state agencies. If you would like to see the other listings search "Governor's Summer Intern" on the Work for Indiana website https://workforindiana.in.gov

EAPS GRAD STUDENT RESEARCH OPPORTUNITIES

If you are interested in an EAPS grad research opportunity, click here for more information.

STEM STUDENT CONTESTS
Correlation One is a New York based startup that hosts data science and engineering competitions for the world’s best STEM students. This spring, they are hosting two competitions for Purdue University students:
East Coast Regional Datathon
Midwest Regional Terminal
Participating students will compete for $15,000 in cash prizes, and will also be eligible for exclusive recruiting opportunities with Citadel LLC and Citadel Securities. The event is open to all the current students (including undergraduate, graduate, Ph.D., and post-doc researchers).

2022 INDIANAVIEW STUDENT SCHOLARSHIP
The IndianaView Student Scholarship Program provides an opportunity for participants at our member institutions to support the goals and objectives of IndianaView and AmericaView. IndianaView will award up to six $750 scholarships to six different students. The purpose of the scholarship program is to promote student development in remote sensing and other geospatial technologies.
Who Can Apply? Undergraduate or graduate students using remote sensing and/or other geospatial technologies in their research at any of the IndianaView educational institutions.
Scholarship applicants must be endorsed by a faculty member from one of these educational institutions.
What activities does the scholarship support? IndianaView wishes to see a significant portion of the award used to support fieldwork that complements a student’s research, travel to a professional meeting, data purchase, software purchase, minor equipment purchase, professional society membership, journal subscription, publication cost, and/or book purchase. The scholarship cannot support international travel.
Please include the following in your application (send via email):
Resume -- Your CV/Resume must include: a) your name, address, phone number, and e-mail address; b) educational background; c) work experience (if applicable); d) personal involvement with remote sensing and other
geospatial technologies (through coursework, projects, work experience, or any other activity).

Essay -- Please include a 1-page essay (double-spaced) that addresses your personal interest in remote sensing and/or other geospatial technologies and your plan (including time frame) for using the scholarship funds to promote your personal development in the field.

Letter of Recommendation — The faculty member who is endorsing you should send a letter of recommendation in a separate email.

Submit the application documents via email to: kongn@purdue.edu.

All materials must be received by the end of the day on February 25, 2022. Valid applications will be considered by a review panel. Awards will be announced in mid-March 2022. Note: Students receiving awards are required to provide feedback about how the scholarship benefited their professional development and prepare a fact sheet about the project. Fact sheet templates will be provided. Funds must be spent by August 31, 2022.

For questions, contact Dr. Nicole Kong, IndianaView Coordinator.
Dr. Nicole Kong, Director, IndianaView
340 Centennial Mall Dr.,
West Lafayette, IN 47907-2058
E-mail: kongn@purdue.edu
Telephone: (765) 496-9474

METEOROIDS 2022 CONFERENCE
June 13-17, 2022
Virtual

The Meteoroids 2022 local organizing committee has closely watched ongoing developments of the COVID-19 pandemic and met to reconsider in-person delivery in Huntsville, Alabama. Given the recent sharp increase in positive cases and the unpredictable appearance of new variants, the committee has decided to shift the conference from in-person to fully virtual. Although it is disappointing not to be able to meet in person, the health and safety of all participants is our top priority.

Meteoroids 2022 is the eleventh international conference in a triennial series of meetings on meteoroids, their origins, and their associated phenomena. Past conferences have featured a combination of invited and contributed talks and posters covering topics such as meteor observational techniques, meteorite recoveries, meteoroid stream dynamics, ablation physics and airbursts, impacts on airless bodies, the production of dust and meteoroids by asteroids and comets, space missions, and spacecraft anomalies.

We look forward to planning a successful conference and to seeing you virtually! Details will be available soon.

Important: To be added to the mailing list to receive additional information about this conference, submit an indication of interest.

Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the meeting portal before the conference to update your profile information. From the meeting portal home page, click on Edit Profile to get started.

For more information, contact Meeting and Publication Services, USRA/Lunar and Planetary Institute.

ADVANCING IDEA IN PLANETARY SCIENCE
Call for Abstracts and Registration Now Open!
Advancing IDEA in Planetary Science
April 25-April 29, 2022
Virtual

Call for Abstracts: Abstract submission deadline -- February 23, 2022, 5:00 p.m. U.S. Central Standard Time

Registration fees are not being collected for this virtual conference, but registration is required for communication purposes, including virtual access information.

Registration is available through April 29, 2022.

Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the meeting portal before the workshop to update your profile information. From the meeting portal home page, click on Edit Profile to get started.

For more information, contact Meeting and Publication Services, USRA/Lunar and Planetary Institute.

APOLLO 17 – ANGSA WORKSHOP
October 26–28, 2022
Lunar Planetary Institute
Houston, Texas

The 3-day workshop is currently planned as an in-person workshop, October 26–28, 2022, at the Lunar and Planetary Institute in Houston, Texas.
The 50th anniversary of the Apollo 17 mission is in Dec. 2022. By every metric, this mission to the Taurus-Littrow Valley (TLV) was the most accomplished of any of the Apollo missions to the moon, leading to 50 years of extensive, continuing analytical investigations of its observations, samples, photography, and geophysical data. The goals of this workshop are:

• revisiting the TLV by integrating new geologic and exploration context, new ANGSA sample data, orbital observations, and the full breadth of data sets from all six Apollo landed missions for a fuller understanding of the moon, the sun, and the earth
• establishing links among multiple generations of lunar scientists and engineers as we prepare for our future on the moon
• focusing on scientific and design lessons learned from both Apollo and from ANGSA in preparation for near-term human exploration of the moon.

We will also focus on specific topics, with short reports expected from the breakout groups and presented during the workshop. Presentations and results of the workshop will form the basis of a special issue in a peer-reviewed journal. Manuscripts for this special issue will be due within three months after the workshop.

SCIENCE OBJECTIVES FOR HUMAN EXPLORATION OF MARS WORKSHOP
NEW DATES: May 4–6, 2022
Denver, Colorado

The Science Objectives for Human Exploration of Mars Workshop will be delivered on May 4–6, 2022 (new dates) in Denver, Colorado, with some components available virtually. The workshop is co-sponsored by NASA’s Science Mission Directorate and the Human Exploration and Operations Mission Directorate to actively engage the scientific community to determine what science could be done by human crews on the Martian surface and how it can be achieved. This workshop will discuss the highest priority science objectives for a first human mission to Mars and then develop several different possible concepts of operation that will enable that science. With the Artemis missions, humans will return to the Moon using innovative technologies to explore the lunar surface. We will use what we learn on and around the Moon to send the first astronauts to Mars. A human mission to Mars will be a landmark achievement and a golden opportunity to conduct groundbreaking science on Mars. The potential scope of the science activities is extraordinary.

Call for Abstracts: Abstract submission deadline -- February 24, 2022, 5:00 p.m. U.S. Central Standard Time (GMT -6)

Refer to the workshop website for detailed abstract submission information regarding contribution expectations, notional scenarios for a human mission to Mars, format, and guidelines.

Registration

In-Person registration deadline -- April 20, 2022
Virtual registration deadline -- May 6, 2022

Registration fees are not being collected for this workshop, but registration is required. Before the workshop, registered attendees will receive an email from Houston Meeting Info with virtual connection information.

MS AND PhD EAPS STUDENTS BROADEN YOUR GRAD EXPERIENCE

For those MS and PhD students in EAPS that would like to broaden their graduate experiences while at Purdue, EAPS is affiliated with the Computational Interdisciplinary Graduate Programs (CIGP) at Purdue. While working toward a graduate degree in EAPS, graduate students can also have a concentration (specialization) in the area of Computational Science and Engineering (CSE). For more information, click here. A short video about the CIGP/CSE program can be found here.

Spring Application Deadline: March 1
Fall Application Deadline: October 1

POSITIONS AVAILABLE - CAREER OPPORTUNITIES

USGS GEOCHRONOLOGY DATABASE IS HIRING AT THE MASTERS LEVEL

Facility Operations Specialist

The USGS geochronology database (still in beta form, but hoping to go live in 2022) team is hiring at the master's level (GS-9, see here for qualifications). The hire will work with our team to continue building and populating the database. We’re especially looking for people with experience with geochronology and/or databases.

We expect an ad to go live on USA Jobs soon. The system will likely only accept the first 100 applicants, which is often reached within the first day of posting. Anyone interested can contact
Leah Morgan (mailto:lemorgan@usgs.gov) with questions.

BRYAN ENVIRONMENTAL CONSULTANTS
Homewood, IL
SEEKING PART-Time TO FULL-Time POSITIONS
- Bachelor's or Master's degree in environmental engineering, civil engineering, geotechnical engineering, geology
- Knowledge of State and Federal environmental regulations a plus
- Experience with Phase I and II Environmental Site assessments a plus
- Strong writing skills
- Proficient in all Microsoft Office applications
- Must have cell phone and computer (laptop)
- Valid Driver's License

WANG ENGINEERING
SEEKING Engineering Geologists, Geotechnical Engineers
Contact: Cornelia Lidia Marin, PG

POST-DOC OPPORTUNITY - AIR FORCE SCIENCE & TECHNOLOGY FELLOWSHIPS
The National Academies of Sciences, Engineering, and Medicine administers postdoctoral and senior research awards at the U.S. Air Force Research Laboratory (AFRL), the U.S. Air Force Institute of Technology (AFIT), and the U.S. Air Force Academy (USAFA) under the Air Force Science & Technology Fellowship Program (AF STFP).
Seeking highly qualified candidates who are U.S. citizens and hold, or anticipate earning, a doctorate in a variety of fields of science or engineering.
Application deadline dates (four annual review cycles): February 1, May 1, August 1, November 1
Awardees have the opportunity to:
- Conduct independent research in an area compatible with the interests of the Air Force laboratories
- Devote full-time effort to research and publication
- Access the excellent and often unique Air Force research facilities
- Collaborate with leading scientists and engineers
- Awardee benefits:
  - Base stipend starting at $76,542; may be higher based on experience
  - Health insurance (including dental/vision), relocation benefits, and a professional travel allowance

Applicants should contact prospective AFRL, AFIT and USAFA Research Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities. For detailed program information, to search for AFRL, AFIT, and USAFA Research Opportunities, and to contact prospective Research Adviser(s), visit www.nas.edu/afstfp.

PURDUE ENVISION CENTER (UNDER ITAP)
RECRUITING EAPS STUDENTS
At the Envision Center looking to recruit EAPS students with background and interest in weather visualization. Details on the job opening can be found here.

NATIONAL WEATHER SERVICE
POSITIONS AVAILABLE
Check here for available positions with the National Weather Service.

ASTROCAMP
AstroCamp is looking for graduating students (undergraduate or graduate) for a full-time program instructor position for physical sciences and astronomy concepts at their outdoor science school in California. Link to job here.

AGI GEOSCIENCE JOB CENTER
Check listings here.

GRADIENT CORP
MULTIPLE OPPORTUNITIES
Please feel free to contact Qian Zhang if you are interested in applying and/or have any questions about the company and the opportunities.

FURMAN UNIVERSITY
Assistant/Associate/Professor in Water Resources
The Department of Earth, Environmental, and Sustainability Sciences at Furman University invites applications for a tenure-track Assistant/Associate/Professor position in Water Resources beginning in August 2022. The successful candidate will have a Ph.D. in Earth Sciences with a specialization in hydrology, hydrogeology, hydroclimatology, or closely related fields prior to August 1, 2022. Candidates must demonstrate a commitment to excellence.
in teaching, mentoring, and establishing a productive research program that leads to transformative experiences for undergraduate students through mentored thesis research, which is a required hallmark of our program. We seek candidates whose teaching and scholarship align with the department’s integrated focus on sustainability, resilience, equity, and social justice within the context of the water, energy, food, and climate nexus. Teaching responsibilities consist of four courses with labs per year, including an introductory level earth science course and upper-level courses in Hydrogeology and Watershed Hydrology. In addition, there will be opportunities to offer a first-year writing seminar and courses in the area of candidate’s expertise.

POSTDOC IN STABLE ISOTOPES AND REACTION KINETICS – INDIANA UNIVERSITY

Applications are invited for a Postdoctoral Research Associate at Indiana University, USA. The project aims using non-traditional stable isotopes to measure reaction rates and understand the mechanisms of mineral-aqueous solution reactions. See our recent publications for details (Zhu et al., 2016, Chemical Geology; Zhu et al., 2020, 2021, GCA). The project will employ a combined experimental, analytical, theoretical, and modeling approach. The successful candidate will hold a Ph.D. in earth sciences or a closely related field. A strong background in either stable isotopes or kinetics and thermodynamics is required. Experience performing aqueous geochemical experiments, and using geochemical equilibrium and kinetics models is highly desirable. Salary is competitive and includes fringe benefits. The initial appointment will be for one year, with the expectation of renewable for another two years, subject to performance and funding availability. The candidate will be based on the Bloomington campus of Indiana University, and will have access to an extensive suite of analytical tools, including MC-ICP-MS, TIMS, ICP-OES, ICP-MS, FESEM, and FETEM.

OPEN POSITIONS AT UTAH STATE

Assistant Professor, Climate Resiliency Extension Specialist- We seek an individual with expertise in climate mitigation, adaptation, and resilience science alongside a depth of knowledge in any related natural resource management field (e.g., water resources and conservation, water quality, aquatic ecology, fish ecology, fisheries management, plant, riparian, and wetland management, biogeochemistry). Successful candidates must have a commitment to stakeholder engagement, co-production of knowledge, collaborative decision-making, teamwork, and communication, as well as strong interpersonal skills. We are particularly interested in innovative candidates committed to helping natural resource managers adapt to and mitigate climate change impacts. The primary clientele for this Extension Specialist will be local, federal, and state agency staff and/or industry partners charged with managing natural resources in Utah and throughout the Intermountain West. The position consists of 60% extension, 30% research, and 10% service, with an anticipated start date of August 1, 2022.

POSITIONS AVAILABLE IN METEOROLOGY AND ATMOSPHERIC SCIENCE

NEWSLETTER INFO

IMPORTANT NOTICE ABOUT THIS NEWSLETTER

This newsletter is used as the primary information source for current and upcoming events, announcements, awards, grant opportunities, and other happenings in our department and around campus. Active links to additional information will be provided as needed. Material for inclusion in the newsletter should be submitted to Cheryl Pierce (pierce81@purdue.edu) by 5:00pm on Thursday of each week for inclusion in the Monday issue.

For answers to common technology questions and the latest updates from the EAPS Technology Support staff, click here. As an additional resource for information about departmental events, seminars, etc., see our departmental calendar.
