Tell us about your major. #1minscience

We are giving prizes each month to an entry for the 1 Minute Science Challenge. One of the most popular #1minscience videos we have is Ryland's "What is Environmental Science? Students want to know what you study in your major. Record a **vertical** video that is under 1 minute and send the video to Steven Smith (mrsmith@purdue.edu). You can use your phone or get with Steven and he can record/edit for you in the outreach lab! Let's take a minute and tell the world what we study!

WANT TO HELP OUTREACH? Write a favorable review on the Superheroes of Science podcast. This helps their ratings go up and helps them become more visible in various podcast platforms.

NEWS/OPPORTUNITIES

FACULTY CANDIDATE COS ORIGINS OF LIFE

SEARCH – DR. ROGER BRYANT

TODAY 10:30-11:30 A.M. HAMP 2244 OR

VIRTUAL

Dr. Roger Bryant Post-Doctoral Scholar University of Chicago [Website](#) [Curriculum Vitae](#)

Public Seminar: "Unlocking the chapters of Earth and life's co-evolution"

Abstract: Earth's changing surface conditions have been crucial to the origins and evolution of life on Earth. However, little robust information exists about key environmental variables (e.g., T, pH, pCO₂, and pO₂) in deep time. Similarly, our records of former life on Earth are complicated by an incomplete fossil record. In this talk, I will discuss new ways of understanding key environmental variables from the rock record, using sulfur isotopes in sedimentary pyrite and sulfates. I will then present my vision for future research at Purdue University, which will investigate how life and environments have co-evolved through Earth's history.

Bio: Dr. Bryant is a low-temperature geochemist who works on understanding the preservation of environmental signals in sedimentary rocks. He got his PhD in Earth & Planetary Sciences from Washington University in St. Louis in 2019, under the supervision of Prof. David Fike. Since then, he has been a postdoctoral scholar in the Dept. of the Geophysical Sciences at the University of Chicago, working with Prof. Clara Blättler. Co-Host Contact: [Stephanie Olson](#) & [Brandon Johnson](#)

PSPSPS SEEKING SUBMISSIONS OF PET PHOTOS FOR CALENDAR

The EAPS 22-23 Committee on Planning the Selection of Purdue's Special PetS (PSPSPS) is seeking submissions of pet photos from willing participants within the EAPS department for inclusion in an upcoming publication. This objective of this program is to create a calendar showcasing the lovely pets within our department and give them the recognition and attention they deserve. [Please fill out this form for submission.](#) (Google login required to submit form.) The calendar will cover an 18-month period, beginning in August of 2022 and ending in December 2023. If you have multiple pets that you would like included, please try to include them in the same photo. **If anyone has important dates they would like included in the calendar, those can be added as well (pending committee approval outlined in the PSPSPS handbook). The submission deadline to be included in the calendar is February 28, 2022.** We will send out regular reminders until that point. Calendars will likely cost \$15-20 and the money will support the EAPS Graduate Student Assembly. Please do not hesitate to reach out to hvannier@purdue.edu if you have any questions.

PRIVATE COLLECTIONS TOUR – INDIANA STATE MUSEUM

Join CICA WG on Sat. Feb. 5 for a private collections tour at the Indiana State Museum! The Central Indiana Chapter of the Association for Women Geoscientists (CICA WG) welcomes you to join us for a private, behind-the-scenes collection tour at the Indiana State Museum on **Saturday February 5 from 10am - noon**. Please see our [website](#) for more information, and a link to RSVP. We are limited to 20 participants; reserve your spot soon! Want to become a member of the CICA WG? Look for information on our website!

APOPHIS T-7 YEARS: KNOWLEDGE OPPORTUNITIES FOR THE SCIENCE OF PLANETARY DEFENSE

Call for Abstracts and Registration Now Open!
May 11-May 13, 2022
Virtual

The Apophis T-7 Years: Knowledge Opportunities for the Science of Planetary Defense virtual workshop is scheduled for May 11–13, 2022.

This workshop will explore the dynamic details and corresponding science opportunities presented by the April 13, 2029, near-miss passage of the asteroid Apophis.

Call for Abstracts: Abstract submission deadline—March 23, 2022, 5:00 p.m. U.S. Central Daylight Time (GMT -5)

Registration: Registration fees are being collected for this virtual workshop. Only registered attendees will receive an email from Houston Meeting Info with virtual connection information.

Registration is available through May 13, 2022. Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the [meeting portal](#) before the workshop to update your profile information. From the meeting portal home page, click on Edit Profile to get started. For more information, contact: Meeting and Publication Services, USRA/Lunar and Planetary Institute meetinginfo@hou.usra.edu

EAPS GRAD STUDENT RESEARCH OPPORTUNITIES

If you are interested in an EAPS grad research opportunity, [click here](#) for more information.

ANNOUNCING THE FIFTH HANDS-ON TRAINING IN HANDLING AND MANIPULATION OF SMALL EXTRATERRESTRIAL SAMPLES

April 13–15, 2022

**Purdue University, West Lafayette, Indiana
(Boiler up!)**

Applications are being accepted!

Many current and future extraterrestrial sample collections do and will consist of small particles — less than 100 micrometers across — and these can be challenging to work with. Such samples include Earth-collected cosmic dust, returned comet and interstellar samples from Stardust; and returned asteroid samples from the Hayabusa, Hayabusa2, and OSIRIS-REx missions. In this training, attendees will receive hands-on training in manipulation and micromanipulation of comparable small samples, learning from the experts from the Astromaterials Research Division at Johnson Space Center (JSC) and Purdue University.

Application deadline: January 31, 2022

For training details and to submit your application, please visit the [website](#).

For more information, contact, Meeting and Publication Services, USRA/Lunar and Planetary Institute, meetinginfo@hou.usra.edu

2022 INDIANAVIEW STUDENT SCHOLARSHIP

The IndianaView Student Scholarship Program provides an opportunity for participants at our member institutions to support the goals and objectives of IndianaView and AmericaView. IndianaView will award up to six \$750 scholarships to six different students. The purpose of the scholarship program is to promote student development in remote sensing and other geospatial technologies.

Who Can Apply? Undergraduate or graduate students using remote sensing and/or other geospatial technologies in their research at any of the [IndianaView educational institutions](#). Scholarship applicants must be endorsed by a faculty member from one of these educational institutions.

What activities does the scholarship support? IndianaView wishes to see a significant portion of the award used to support fieldwork that complements a student's research, travel to a professional meeting, data purchase, software purchase, minor equipment purchase, professional society membership, journal subscription, publication cost, and/or book purchase. The scholarship cannot support international travel.

Please include the following in your application (send via email):

Resume – Your CV/Resume must include: a) your name, address, phone number, and e-mail address; b) educational background; c) work experience (if applicable); d) personal involvement with remote sensing and other geospatial technologies (through coursework, projects, work experience, or any other activity).
Essay – Please include a 1-page essay (double-spaced) that addresses your personal interest in remote sensing and/or other geospatial technologies and your plan (including time frame) for using the scholarship funds to promote your personal development in the field.
Letter of Recommendation – The faculty member who is endorsing you should send a letter of recommendation in a separate email.
Submit the application documents via email to: kongn@purdue.edu.

All materials must be received by the end of the day on February 25, 2022. Valid applications will be considered by a review panel. Awards will be

announced in mid-March 2022. Note: Students receiving awards are required to provide feedback about how the scholarship benefited their professional development and prepare a fact sheet about the project. Fact sheet templates will be provided. Funds must be spent by August 31, 2022.

For questions, contact Dr. Nicole Kong, IndianaView Coordinator.

Dr. Nicole Kong, Director, IndianaView
340 Centennial Mall Dr.,
West Lafayette, IN 47907-2058
E-mail: kongn@purdue.edu
Telephone: (765) 496-9474

UNDERGRAD RESEARCH OPPORTUNITY- ARCTIC REU GREENLAND

Arctic REU Greenland is an NSF Research Experiences for Undergraduates (REU) site led by Concord University (West Virginia) and Montana State University. The REU is focused on field research in Precambrian metamorphic rocks integrating geologic mapping, structural geology, and earthquake geodynamics.

Travel expenses to the program and full logistical support for fieldwork in Greenland will be provided. Students will receive stipends of up to \$5000 to support their work. Funding for travel to a geologic conference in the fall to present research results is also included.

Field work in Greenland is scheduled for June 23 to August 4, 2022 (pandemic dependent). Students will participate in online seminars and research activities before field work in April and early May, and again in late-July and August after our return.

Applicants should be undergraduates with a planned date of graduation no earlier than December, 2022. Ideally, applicants should have completed or be enrolled in a course in mineralogy, petrology, or Earth materials, although exceptions are possible. Coursework in structural geology and/or field geology or field methods is useful. NSF requires REU participants to be US citizens or permanent residents. Because of the late start time in July, students completing a geology field camp early in the summer may be able to attend this REU.

We especially encourage applications from first-generation college students and members of under-represented groups.

**LOW-COST SCIENCE MISSION CONCEPTS
FOR MARS EXPLORATION
WORKSHOP POSTPONED
PASADENA, CALIFORNIA**

As a consequence of the recent and significant rise in covid-19 cases, the organizing committee for the low-cost science mission concepts for mars exploration workshop has decided to postpone the meeting. The workshop, originally planned for January 11--13, 2022, is now scheduled for March 29--31, 2022, and will be held at the same venue, the Westin Pasadena Hotel in Pasadena, CA.

**MASTER OF SCIENCE IN ENVIRONMENTAL
SCIENCE FUNDED GRADUATE ASSISTANTSHIP –
VILLANOVA UNIVERSITY**

The Department of Geography and the Environment at Villanova University invites applications for a graduate student to participate in a [NOAA-funded research project](#) investigating why tornado disaster potential and mortality is greater in the Southeast compared to any other U.S. region. Overall, the project is focused on developing tangible and actionable solutions to the Southeast tornado problem, especially for the region's more vulnerable demographics. We seek a student who is excited to engage in a collaborative, interdisciplinary project that will culminate in an M.S. degree in Environmental Science. The successful applicant will lead and work alongside undergraduates who are assisting on research aimed at uncovering the relationships between tornado risk, warnings, reports, and societal vulnerability. The candidate will also develop a thesis project that supports this funded NOAA project.

The successful candidate must: (1) fulfill all admission requirements for the MS in Environmental Science program and the Graduate College of Liberal Arts and Sciences at Villanova University; (2) have a BS in environmental science, atmospheric science, geography, earth sciences, or related discipline; (3) have existing or be willing to develop their geographic information system (GIS) skillset; and (4) be willing to lead a group of and work alongside undergraduate students to solve problems central to the project goals. We welcome and encourage applicants from groups

historically underrepresented in STEM and Environmental Science. The fully funded student position (stipend + tuition waiver) is available starting August 2022. Villanova is a Catholic university sponsored by the Augustinian order, located in the ethnically, racially, and culturally diverse Philadelphia metro region. Diversity and inclusion have been and will continue to be an integral component of the University's and the Department's missions. To apply, email a cover letter, CV, copies of transcripts, GRE scores, and the names and contact information of three references able to speak about your academic experiences to [Dr. Stephen Strader](#). For full programmatic requirements see here. In addition, we ask the candidate to also **apply to the program using the prior link officially by 1 February 2022**. Only those students who officially apply to the MSES program through the Graduate School by 1 February 2022 will be considered. Note: Please indicate in your application materials that you wish to be considered for "Dr. Strader's NOAA grant funding". Applications will be reviewed beginning 1 February 2022, with funding decisions made by 1 April 2022.

METEORIDS 2022 CONFERENCE
June 13--17, 2022
Virtual

The Meteoroids 2022 local organizing committee has closely watched ongoing developments of the COVID-19 pandemic and met to reconsider in-person delivery in Huntsville, Alabama. Given the recent sharp increase in positive cases and the unpredictable appearance of new variants, the committee has decided to shift the conference from in-person to fully virtual. Although it is disappointing not to be able to meet in person, the health and safety of all participants is our top priority.

Meteoroids 2022 is the eleventh international conference in a triennial series of meetings on meteoroids, their origins, and their associated phenomena. Past conferences have featured a combination of invited and contributed talks and posters covering topics such as meteor observational techniques, meteorite recoveries, meteoroid stream dynamics, ablation physics and airbursts, impacts on airless bodies, the production of dust and meteoroids by asteroids and comets, space missions, and spacecraft anomalies. We look forward to planning a successful conference and to seeing you virtually! Details will be available soon.

Important: To be added to the mailing list to receive additional information about this conference, submit an indication of interest. Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the meeting portal before the conference to update your profile information. From the [meeting portal home page](#), click on Edit Profile to get started. For more information, contact [Meeting and Publication Services](#), USRA/Lunar and Planetary Institute

ADVANCING IDEA IN PLANETARY SCIENCE
Call for Abstracts and Registration Now Open!
Advancing IDEA in Planetary Science
April 25--April 29, 2022
Virtual

The Advancing IDEA in Planetary Science virtual conference is scheduled for April 25--29, 2022. **Call for Abstracts: Abstract submission deadline -- February 23, 2022, 5:00 p.m. U.S. Central Standard Time (GMT -6)**

Registration fees are not being collected for this virtual conference, but registration is required for communication purposes, including virtual access information.

Registration is available through April 29, 2022. Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the meeting portal before the workshop to update your profile information. From the [meeting portal home page](#), click on Edit Profile to get started. For more information, [contact](#): Meeting and Publication Services, USRA/Lunar and Planetary Institute

APOLLO 17 – ANGSA WORKSHOP
October 26–28, 2022
Lunar Planetary Institute
Houston, Texas

The 3-day workshop is currently planned as an in-person workshop, October 26–28, 2022, at the Lunar and Planetary Institute in Houston, Texas. The 50th anniversary of the Apollo 17 mission is in Dec. 2022. By every metric, this mission to the Taurus-Littrow Valley (TLV) was the most accomplished of any of the Apollo missions to the moon, leading to 50 years of extensive, continuing

analytical investigations of its observations, samples, photography, and geophysical data. The goals of this workshop are:

- revisiting the TLV by integrating new geologic and exploration context, new ANGSA sample data, orbital observations, and the full breadth of data sets from all six Apollo landed missions for a fuller understanding of the moon, the sun, and the earth
- establishing links among multiple generations of lunar scientists and engineers as we prepare for our future on the moon
- focusing on scientific and design lessons learned from both Apollo and from ANGSA in preparation for near-term human exploration of the moon.

We will also focus on specific topics, with short reports expected from the breakout groups and presented during the workshop. Presentations and results of the workshop will form the basis of a special issue in a peer-reviewed journal. Manuscripts for this special issue will be due within three months after the workshop.

SCIENCE OBJECTIVES FOR HUMAN
EXPLORATION OF MARS WORKSHOP
NEW DATES: May 4-6, 2022
Denver, Colorado

The Science Objectives for Human Exploration of Mars Workshop will be delivered on May 4–6, 2022 (new dates) in Denver, Colorado, with some components available virtually.

The workshop is co-sponsored by NASA's Science Mission Directorate and the Human Exploration and Operations Mission Directorate to actively engage the scientific community to determine what science could be done by human crews on the martian surface and how it can be achieved. This workshop will discuss the highest priority science objectives for a first human mission to Mars and then develop several different possible concepts of operation that will enable that science. With the Artemis missions, humans will return to the Moon using innovative technologies to explore the lunar surface. We will use what we learn on and around the Moon to send the first astronauts to Mars. A human mission to Mars will be a landmark achievement and a golden opportunity to conduct groundbreaking science on Mars. The potential scope of the science activities is extraordinary.

Call for Abstracts: Abstract submission deadline -- February 24, 2022, 5:00 p.m. U.S. Central Standard Time (GMT -6)

Refer to the workshop website for detailed abstract submission information regarding contribution expectations, notional scenarios for a human mission to Mars, format, and guidelines. Registration

In-Person registration deadline -- April 20, 2022

Virtual registration deadline -- May 6, 2022

Registration fees are not being collected for this workshop, but registration is required. Before the workshop, registered attendees will receive an email from Houston Meeting Info with virtual connection information.

Meeting Portal Updates: We have modified the meeting portal to follow best practices that support inclusion, diversity, equity, and accessibility. We encourage you to log into the meeting portal before the workshop to update your profile information. From the meeting [portal home page](#), click on Edit Profile to get started.

MS AND PHD EAPS STUDENTS

BROADEN YOUR GRAD EXPERIENCE

For those MS and PhD students in EAPS that would like to broaden their graduate experiences while at Purdue, EAPS is affiliated with the Computational Interdisciplinary Graduate Programs (CIGP) at Purdue. While working toward a graduate degree in EAPS, graduate students can also have a concentration (specialization) in the area of Computational Science and Engineering (CSE). For more information, [click here](#). A short video about the CIGP/CSE program can be found [here](#).

Spring Application Deadline: March 1

Fall Application Deadline: October 1

POSITIONS AVAILABLE- CAREER OPPORTUNITIES

USGS GEOCHRONOLOGY DATABASE IS HIRING

AT THE MASTERS LEVEL

Facility Operations Specialist

The USGS geochronology database (still in beta form, but hoping to go live in 2022) team is hiring at the master's level (GS-9, [see here](#) for qualifications). The hire will work with our team to continue building and populating the database. We're especially looking for people with experience with geochronology and/or databases.

We expect an ad to go live on USA Jobs soon. The system will likely only accept the first 100 applicants, which is often reached within the first day of posting. Anyone interested can contact Leah Morgan (<mailto:lemorgan@usgs.gov>) with questions.

BRYAN ENVIRONMENTAL CONSULTANTS

Homewood, IL

SEEKING PART-TIME TO FULL-TIME POSITIONS

- Bachelor's or Master's degree in environmental engineering, civil engineering, geotechnical engineering, geology
- Knowledge of State and Federal environmental regulations a plus
- Experience with Phase I and II Environmental Site assessments a plus
- Strong writing skills
- Proficient in all Microsoft Office applications
- Must have cell phone and computer (laptop)
- Valid Driver's License

POST-DOC OPPORTUNITY - AIR FORCE SCIENCE & TECHNOLOGY FELLOWSHIPS

The National Academies of Sciences, Engineering, and Medicine administers postdoctoral and senior research awards at the U.S. Air Force Research Laboratory (AFRL), the U.S. Air Force Institute of Technology (AFIT), and the U.S. Air Force Academy (USAFA) under the [Air Force Science & Technology Fellowship Program \(AF STFP\)](#).

Seeking highly qualified candidates who are U.S. citizens and hold, or anticipate earning, a doctorate in a variety of fields of science or engineering.

Application deadline dates (four annual review cycles): February 1, May 1, August 1, November 1

Awardees have the opportunity to:

- Conduct independent research in an area compatible with the interests of the Air Force laboratories
- Devote full-time effort to research and publication

- Access the excellent and often unique Air Force research facilities
- Collaborate with leading scientists and engineers
- Awardee benefits:
- Base stipend starting at \$76,542; may be higher based on experience
- Health insurance (including dental/vision), relocation benefits, and a professional travel allowance

Applicants should contact prospective AFRL, AFIT and USAFA Research Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities.

For detailed program information, to search for AFRL, AFIT, and USAFA Research Opportunities, and to contact prospective Research Adviser(s), visit www.nas.edu/afstfp.

PURDUE ENVISION CENTER (UNDER ITAP)
RECRUITING EAPS STUDENTS

At the Envision Center looking to recruit EAPS students with background and interest in weather visualization. Details on the job opening can be found [here](#).

M.S. GRAD RESEARCH ASSISTANTSHIP:
IDAHO STATE UNIVERSITY & USGS

Water Science Center at the Idaho National Laboratory

Overview: The graduate student will work with faculty in the Department of Geosciences at Idaho State University (ISU) and geoscientists at the U.S. Geological Survey (USGS) Water Science Center at the Idaho National Laboratory (INL). Ongoing work by the USGS at the INL aims to characterize the eastern Snake River Plain aquifer with respect to the migration of radioactive and chemical wastes. To this end, the USGS has drilled deep boreholes in order to monitor groundwater and better constrain the stratigraphy beneath the INL by regionally correlating subsurface volcanic and sedimentary rocks. The rock core recovered from these boreholes also offers a unique 4D perspective on the spatial, temporal, and geochemical evolution of this active volcanic province. The details of the MS thesis project are flexible but will fit within the framework of the USGS's goals to better characterize the subsurface; it may also contribute to the INL's active Probabilistic Volcanic Hazard Assessment. The student will work with surface and subsurface data (including logging of basalt-dominated core) and likely apply various analytical techniques (e.g., geochemical analysis,

geochronology, petrography, etc.). The start date is August of 2022.

Qualifications: B.S. in geology or related field; minimum undergraduate GPA of 3.0; and three excellent letters of recommendation. GRE quantitative, verbal, and writing scores above the 50th percentile are preferred. The student must be able to work in a collaborative environment with ISU faculty and the USGS. For information about ISU Geosciences or the USGS Water Science Center, visit [here](#) or [here](#)

Funding: The two-year MS project in the ISU Department of Geosciences is fully funded by the USGS. The student will receive a monthly stipend, including summer support, and a tuition scholarship to pursue graduate studies. Support also includes a \$5,000 research budget and \$1,500 for conference travel.

To apply: Email a letter of interest and CV/resume to Dr. [Kendra Murray](#). Then, **submit a formal application for this position by January 31, 2022.** of intent. More information about the application process and requirements can be found [here](#).

FURMAN UNIVERSITY**Assistant/Associate/Professor in Water Resources**

The Department of Earth, Environmental, and Sustainability Sciences at Furman University invites applications for a tenure-track Assistant/Associate/Professor position in Water Resources beginning in August 2022. The successful candidate will have a Ph.D. in Earth Sciences with a specialization in hydrology, hydrogeology, hydroclimatology, or closely related fields prior to August 1, 2022. Candidates must demonstrate a commitment to excellence in teaching, mentoring, and establishing a productive research program that leads to transformative experiences for undergraduate students through mentored thesis research, which is a required hallmark of our program. We seek candidates whose teaching and scholarship align with the department's integrated focus on sustainability, resilience, equity, and social justice within the context of the water, energy, food, and climate nexus. Teaching responsibilities consist of four courses with labs per year, including an introductory level earth science course and upper-level courses in Hydrogeology and Watershed Hydrology. In addition, there will be opportunities to offer a first-year writing seminar and courses in the area of candidate's expertise.

POSTDOC RESEARCH ASSOCIATE - TEXAS A&M

Texas A&M is looking for a postdoc starting in the January-May 2022 time period. This opportunity is part of the TAMU component of the DOE TRACER project. While there is an aerosol-cloud interaction component, they are particularly looking for someone with experience or interests in idealized modeling of convection and/or radar analysis. They are also looking for someone that can take a leading role in field deployments (mobile radiosonde launches) in summer 2022. [LEARN MORE](#)

POSTDOC IN STABLE ISOTOPES AND REACTION KINETICS – INDIANA UNIVERSITY

[Applications](#) are invited for a Postdoctoral Research Associate at Indiana University, USA. The project aims using non-traditional stable isotopes to measure reaction rates and understand the mechanisms of mineral-aqueous solution reactions. See our recent publications for

details (Zhu et al., 2016, Chemical Geology; Zhu et al, 2020, 2021, GCA). The project will employ a combined experimental, analytical, theoretical, and modeling approach.

The successful candidate will hold a Ph.D. in earth sciences or a closely related field. A strong background in either stable isotopes or kinetics and thermodynamics is required. Experience performing aqueous geochemical experiments, and using geochemical equilibrium and kinetics models is highly desirable.

Salary is competitive and includes fringe benefits. The initial appointment will be for one year, with the expectation of renewable for another two years, subject to performance and funding availability. The candidate will be based on the Bloomington campus of Indiana University, and will have access to an extensive suite of analytical tools, including MC-ICP-MS, TIMS, ICP-OES, ICP-MS, FESEM, and FETEM.

OPEN POSITIONS AT UTAH STATE**Assistant Professor, Climate Resiliency Extension Specialist**

- We seek an individual with expertise in climate mitigation, adaptation, and resilience science alongside a depth of knowledge in any related natural resource management field (e.g., water resources and conservation, water quality, aquatic ecology, fish ecology, fisheries management, plant, riparian, and wetland management, biogeochemistry). Successful candidates must have a commitment to stakeholder engagement, co-production of knowledge, collaborative decision-making, teamwork, and communication, as well as strong interpersonal skills. We are particularly interested in innovative candidates committed to helping natural resource managers adapt to and mitigate climate change impacts. The primary clientele for this Extension Specialist will be local, federal, and state agency staff and/or industry partners charged with managing natural resources in Utah and throughout the Intermountain West. The position consists of 60% extension, 30% research, and 10% service, with an anticipated start date of August 1, 2022.

POSITIONS AVAILABLE IN METEOROLOGY AND ATMOSPHERIC SCIENCE
