LEGEND

- Trails (paved)
- Planned to Open in 2011
- Planned Trail (paved)
- Pedestrian Fitness Trail
- Bicycle Lane (Marked, on street)
- Connecting Route (Unmarked, on street)

Notes: The Wabash Heritage Trail passes through parks managed by the Tippecanoe County, Lafayette, and West Lafayette park boards. Bicycling on the trail is only permitted within the two cities, not the county. Brochures are available from the park departments and the Lafayette-West Lafayette Visitors Center at (765) 447-9999.

"Bikes on Campus (A Guide to Paths and Parking at Purdue University)" is available from the Purdue University Visitor Information Center.

West Lafayette Recreation and Conservation Sites (Revised Spring 2010)

GET UP, GET OUT AND GET MOVING!

The West Lafayette trail system is a city-wide network of non-motorized, shared-use pathways that are used by bicyclists, walkers, hikers, runners, and other users for recreation, exercise, and transportation.

At present there are 15 miles of paved trails in West Lafayette, and more than 40 additional miles are planned. There are also 4 miles of footpaths to enjoy, through the woods in the Celery Bog Nature Area and Cumberland and Happy Hollow Parks.

West Lafayette trails offer an incredibly diverse range of experiences; some trails are located along busy streets, while others traverse beautiful natural places – all within the suburban area of West Lafayette. The system connects neighborhoods, shopping, places of employment, schools, parks, open spaces, and wooded areas, and allows users to combine transportation, recreation, and contact with nature.

Our trail system provides many benefits:

- Trails benefit the economy: Studies have shown that trails attract businesses to communities boost tourism and increase property values.

- Trails improve safe and clean transportation opportunities: With the increasing concern over our environment and the cost of fuel, more people than ever are looking for alternative ways to travel. By design, trails separate cyclists and pedestrians from vehicular traffic. Trail users can get where they're going quickly and safely.

- Trails benefit our overall health: Trails provide an excellent opportunity to experience nature and relax while exercising. Exercise lowers blood pressure and cholesterol levels and reduces stress. Increased physical activity will also reduce the chances of problems from heart disease, cancer, and obesity and will contribute to a healthy lifestyle.

So, get up, get out, and get moving and enjoy the outstanding recreational opportunities that our trail system provides!

John R. Dennis, Mayor
City of West Lafayette
